-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 7/19/2006 with respect to the rejection(s) of claim(s) 1-21 under 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Heck et al (Heck), U.S. Patent Pub. No. 2005/0064883.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Heck.

Regarding claims 1-21, Heck discloses a method comprising receiving a message-notification into a wireless communication device (items 16, 18, 20, 22; figure 1) (WCD), via cellular wireless air interface, the message-notification indicating a data message (i.e., MMS messages coded with an SMS message, wherein the messages can comprise text, audio, voice, video and/or graphics, 0002, 0003) stored in a data network (0025); passing an indication of the message-notification from the WCD to a

computer locally connected with the WCD, responsively sending a message-retrieval request from the computer to a message server over a communication path that does not include the WCD and that does not include the cellular wireless air interface; receiving the data message into the computer in a response to the message-retrieval request (via an established communication link, wherein a server 24 receives a delivery request from the WCD, 0025; figure 3), and rendering the received data message for presentation to a user (0002).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Heinz, U.S. Patent No. 6,298,231, discloses methods, systems, and devices for transmitting messages to wireless devices.

Parsons et al, U.S. Patent No. 7,031,437, discloses a method and system for providing remote access to previously transmitted enterprise messages.
